

R8 Mk1 / RS4 B8 / RS5 B8 / LP570 2-pc Front Rotors Installation Guide

This 365x34mm 2-piece front brake rotor can be fitted onto Audi R8 Mk1 (Type 42), RS4 (B8), RS5 (B8), or Lamborghini Gallardo LP570. The only difference is the positions of the rotor retaining screw holes. During installation, align the correct rotor retaining screw hole of the center hat with the hole of the hub, then insert retaining screw into the hole accordingly.

- For Audi R8 Mk1 (Type 42) and Lamborghini Gallardo LP570, use the rotor retaining screw holes marked as “LP” as shown below in Fig. 1
- For Audi RS4 (B8) and RS5 (B8), use the rotor retaining screw holes marked as “RS” as shown below in Fig. 1

Center hat section of the rotor assembly:
